

Project Design Phase

Problem – Solution Fit Template

Date	27 September 2026
Team ID	[SWTID-2026-9584]
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit means the problem found with the customer is genuinely solved by the proposed solution. Purpose:

- Solve complex problems in a way that fits the state of the customer.
- Succeed faster and increase solution adoption by tapping into existing behaviour.
- Sharpen communication with the right triggers and messaging.
- Increase touch-points by finding the right problem-behaviour fit and building trust.
- Understand the existing situation in order to improve it for the target group.

Problem – Solution Fit Canvas

1. CUSTOMER SEGMENT(S) Employees requesting a standard laptop (new hires and replacement cases), and the internal IT Hardware/Support team who configure it.	6. CUSTOMER CONSTRAINTS Limited IT staff bandwidth; approvals depend on manager availability; no dedicated status-tracking tool outside ServiceNow; hardware stock levels can vary.	5. AVAILABLE SOLUTIONS Manual email/chat handoff from IT procurement to the Hardware team, verbal follow-ups, or spreadsheet tracking — none integrated with the approval step.
2. JOBS-TO-BE-DONE / PROBLEMS Get a fully configured standard laptop to the employee as quickly as possible after approval, without anyone manually chasing status.	9. PROBLEM ROOT CAUSE The Service Catalog request has no automated link to a Hardware team task — creation and assignment currently depend on someone remembering to notify the team.	7. BEHAVIOUR Employees email/message IT for updates; procurement manually pings the Hardware team; the team configures laptops in the order they hear about them, not by approval order.
3. TRIGGERS A new-hire record appears in HR onboarding; a manager requests a replacement; a request sits unassigned for days, prompting a follow-up email.	10. YOUR SOLUTION A Flow Designer flow that automatically creates and assigns a hardware configuration task the moment a standard laptop request is approved, updates the request stage automatically, and notifies the requester when the laptop is ready — removing the manual handoff entirely.	8. CHANNELS OF BEHAVIOUR — 8.1 ONLINE ServiceNow Employee Center (submit/track request), email / in-app notifications, Agent Workspace (Hardware team's task queue).
4. EMOTIONS: BEFORE / AFTER Before: frustrated, unproductive, unsure who to follow up with. After: confident the request is progressing and able to start work without delay.		8.2 OFFLINE Physical laptop handover/pickup at the IT desk; manager verbal approval discussions.
